- Kannada (Fluent)
- Hindi (Fluent)
- English (Fluent)

PROJECTS

MARKET SQUARE (PYTHON/DJANGO)

[DEMO](#)

- Engineered a full-stack e-commerce platform using Django and Python.
- Built and integrated REST APIs to enable real-time product updates and user interactions.
- Enhanced mobile responsiveness and reduced page load times by 30%, achieving a PageSpeed Insights score of 95+ for performance, 100 accessibility, 100 best practices, and 90 SEO.

EXPENSE TRACKER (MERN STACK)

[GITHUB](#)

- Developed a secure financial management tool using MongoDB, Express.js, React, and Node.js.
- Implemented JWT-based authentication and role-based access control for data security.
- Designed an intuitive UI, enabling 50+ users to track expenses and manage budgets effectively.

WEATHER APP (REACTJS)

[GITHUB](#)

- Created a real-time weather application using ReactJS and the OpenWeather API.
- Integrated geolocation features to deliver personalized weather updates with a user-friendly interface.
- Optimized API requests, cutting latency by 25% and improving overall performance.

PORTFOLIO (NEXTJS)

[LINK](#)

- Built a dynamic personal portfolio website hosted at [nikhilmugali-portfolio.vercel.app](#) using Next.js.
- Leveraged server-side rendering and Tailwind CSS for a fast, responsive design showcasing projects.
- Deployed on Vercel, achieving a Lighthouse performance score of 90+ for speed and accessibility.
